

- 1 -

Nr 68

**Av fru Segerstedt Wiberg m. fl., om ändrad praxis vid avgörande
av vissa medborgarskapsärenden.**

(Likasänt med motion nr 102 i Andra kammaren)

Stockholm den 23 januari 1962

Ingrid Segerstedt Wiberg *Eric Carlsson* *Lisa Mattson*

and *trypM* genes. The *trypM* gene encodes a protein that has been shown to regulate membrane integrity and adhesion and bone cell adhesion molecule fibronectin angiogenesis and protease metabolism with the latter being particularly important during differentiation and proliferation.
