Prices in this list are stated at a rather high level, though — except for the cheapest classes of iron prices of which are generally less fluctuating — than lower than in the years 1872—1873.

These figures merely denote as near as possible relative values between different brands and kinds of Swedish Charcoal Iron.

As an indication of the course of the market we beg to state that present prices (in 18) are about $\frac{\text{higher}}{\text{lower}}$ percent than those given in the price-list.

W. 19. For any enquiry of some importance special quotations will be given on application, when buyers state quantities required and delivery wanted.

Prices in this List are stated at a rather high level, though — except for the dearest classes of Iron, prices of which are generally less fluctuating — much lower than in the years 1872—1873.

These figures merely denote, as near as possible, **relative** values between different brands and kinds of Swedish Charcoal Iron.

As an indication of the course of the market we beg to state that **present** prices (in 18) are about percent $\frac{\text{higher}}{\text{lower}}$ than those given in the price-list.

N. B. *For any enquiry of some importance special quotations will be given on application, when buyers state quantities required and delivery wanted.*
